BESPOKE AWNINGS & BLINDS

Family owned James Robertshaw has over 160 years experience of designing, manufacturing and installing bespoke awnings, coverings and blinds for the specific needs of operators in the leisure & hospitality, blind & curtain trade and residential sectors.

About Us.

Our story began back in 1860, when Mr James Robertshaw of Collyhurst, Manchester set up shop manufacturing traditional box shop awnings, complete with hand-carved woodwork. Added to this were metal roller blinds and other companion components, all fabricated on-site, beginning an unbroken trading history spanning an incredible seventeen decades, three centuries and two millennia.

During those first one hundred years, JR cemented its company status with a number of patents, including its famous 'Spring Roller' design in 1908. That commitment to innovation and technical advancement remained at the heart of the organisation ever since

From the Victorian age of the Industrial Revolution, through two World Wars and more than a few depressions, the company survived and thrived. It re-located from its original factory in Collyhurst and settled in a historical spinning mill in Farnworth.

The business stayed within the Robertshaw family until the death of James' grandson, William Lancelot Robertshaw in 1960 and was purchased by then Production Manager Arthur Harrison. It is then that the modern story of JR really begins.

In 1978, the company was taken over by 25 year old Nigel Sharrock, who would carry the JR brand from out of its Victorian history and into the modern world. For nearly forty years, Nigel continually strove to improve products, processes and service that JR is renowned for.

After Nigel's retirement in 2016, JR is still a family owned and managed business with Nigel's wife, Lesley and son Matthew, joining him sitting on the board of directors. In 2010 after 50 years at its Farnworth home, JR re-located again to its current, modern facilities and headquarters at Horwich, Bolton

All products are designed, manufactured and showcased within our current home and Customer Centre. With a wide reaching client base ranging from trade sub-dealers; independent bars and national hospitality brands; architects, contractors, residential, education and health-care; James Robertshaw has the creativity, expertise and knowledge to make a visible difference to any business or home.

James Robertshaw. We don't just find the solution, we create it.

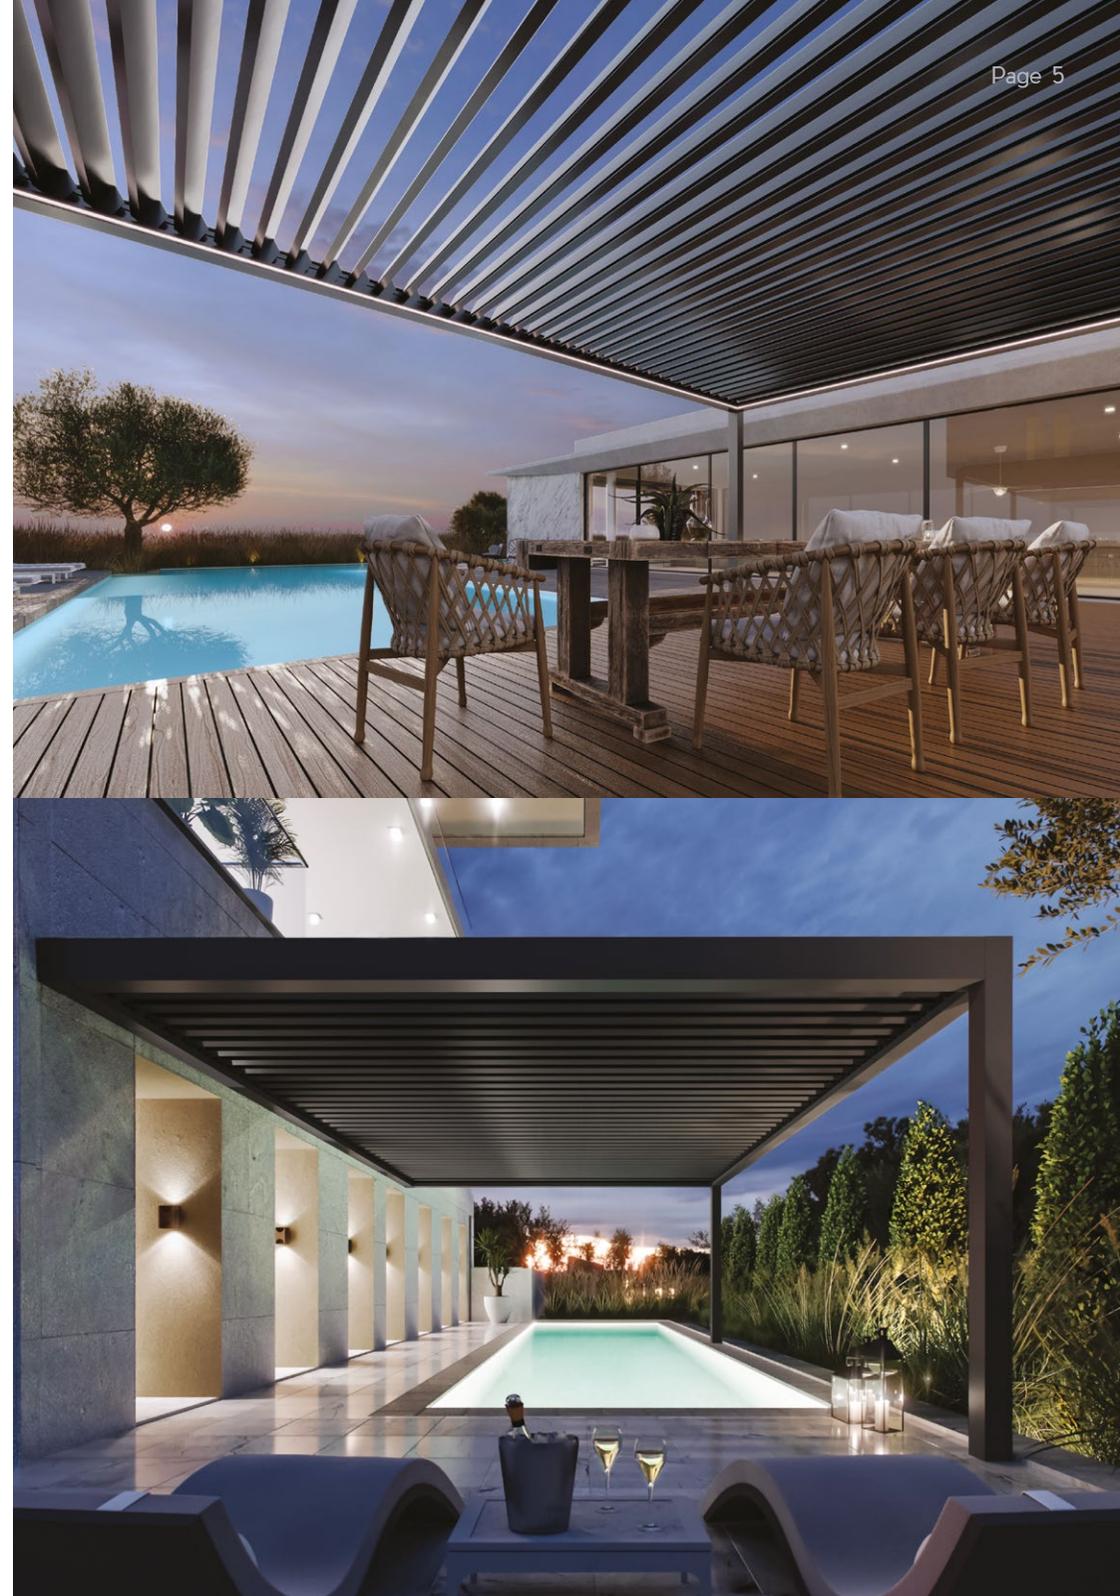

Making it Bioclimatic

Upgrade your outdoor space with the Roma Louvresystem®.

Create an architecturally modern space by utilising the most of natural-energy sources. Roma Louvresystem® provides the best protection against all the weather conditions.

ROMA LOUVRESYSTEM®

Design with a Unique Identity

The design of the Roma Louvresystem® magnetises at first glance. Its straight lines and minimal construction are harmonised in every demanding space.

Sophisticated Luxury

The monumental construction of Roma Louvresystem® gives your space the upgrade you want. your space will become the focus of your gatherings and personal moments of relaxation.

Choose your own pergola system and give your space the uniqueness it deserves. Upgrade your space by adding advanced lighting and sound systems for unique moments of relaxation.

Our System

Our system is based upon the wireless communication protocol called Z-Wave, which is the global market leader in wireless control. Z-Wave devices operate in the sub-1GHz radio band meaning it is impervious to Wi-Fi and other common wireless technologies like Bluetooth, Zigbee, etc. This design means our system is as robust as a fully wired system but without the wires!

Z-Wave products are all designed to work in a Z-Wave system and there are over 3,300 interoperable products currently available, quite simply, we offer the biggest choice of options to control your home or building. From lighting, HVAC, security, swimming pool / spa, access control, curtains / blinds and awnings, multi-media, etc there is almost certainly a Z-Wave device suitable for your needs.

The Z-Wave system is a full 'mesh' network meaning each device is both a receiver and repeater of the system's signals, this vastly improves the reliability of communicating signals because the system learns all the possible routes from its central controller to each device. Furthermore, the 'mesh' network increases the wireless range of the system far beyond many other competitors' systems.

Our system control is wireless, robust and has a vast range making it perfect for installation in both new builds and existing properties, whether as part of a renovation or as a standalone project. Our system and products generally do not require the re-wiring of your home or building both reducing the time and cost of installation compared with most of our competitors' systems and eliminating almost all the inconvenience that goes with such a large project.

At the centre of our system is FIBARO's Home Centre 3, arguably the most advanced home & building central controller currently available. The Home Centre 3 not only controls your system but also links it with many other companies' products, from Alexa to SONOS and many more*. This allows users a far greater choice of products in their homes & buildings, often integrating with existing equipment.

*Subject to selected third party products and with appropriate firmware & software.

ROMA LOUVRESYSTEM®

LED Lighting System “Eye Ray”

The LED “EYE - RAY - EDGE” Lighting System, with its sleek and stylish look, completes the usability of the Louvresystem® series, providing sufficient quality lighting and offering the ideal atmosphere in your outdoor area.

Available in “yellow” or “white” colour light and dimming option.

Certifications

The company's quality management system complies with the ISO 9001:2008 standard, the most well-known and used certification for quality management systems in the world. Certificated by SWISS Approval.

From selecting raw materials, parts and accessories, to production, sales and customer service, quality is the keyword for every process.

Pergosystem® Series introduce a solid and robust awning system, following the European Union safety standards. Marked with CE-marking (UNI EN 13561).

Because of the extreme weather conditions, all original Pergosystem® products are manufactured with inox steel parts, in order to exceed excellent durability.

All authentic Pergosystem® products are accompanied by written warranty.

Our products are known for the ergonomics, safety and unique quality. They are characterized by a unique serial number and identified by a 3D brand hologram mark.

All original Pergosystem® products are tested to weather conditions from Certified Laboratory.

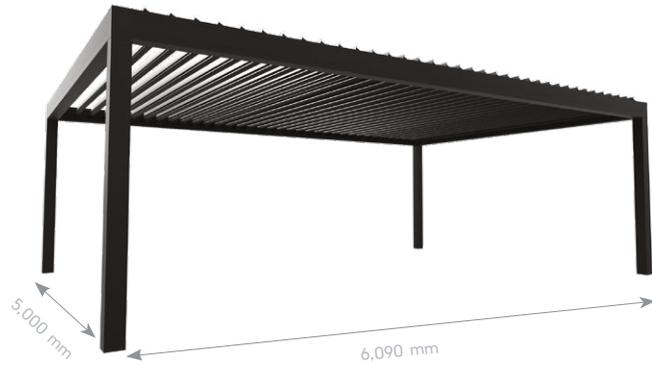

Coloring the system in any RAL of your choice, combined with the wide range of colors and textures of Dickson's blackout fabrics, gives you the ultimate desirable result, in harmony with your personal space, making your Pergosystem unique.

Our sales department, with a great experience in awning systems, are always at your disposal to inform, serve and find the perfect solution to every request for shading and protection.
