Welcome to our Product Portfolio 2024

The information within this brochure is designed to assist you, our valued trade sub-dealers and potential clients, to navigate your way around our product range. We have listened to you and increased the range in line with demand. Your helpful insights and constructive feedback has assisted us to focus on what is important and helpful to you. In partnership we aim to increase opportunities and profitability for all.

Having spent most of my professional life within the business and now as the Managing Director of James Robertshaw, I have seen many changes occur. We have survived an unbroken trading history spanning an incredible sixteen decades, three centuries and two millennia to date, in part because we have diversified and continued to place customer service at the top of our priorities. I am extremely proud of our team at JR. They really care about you.

Innovation is key to future growth. At JR we have consistently worked at 'thinking outside the box' to bring you improved, refined products and customer service, with the benefit of our technical expertise.

We are continually investing in new machinery and developed lean production process, to improve our operational lead-time and quality assurance. As British manufacturers in control of our stock holding, we can help you find the right solution to the end-client's needs.

I see a positive future for our industry with continuous and steady growth. Let our team at JR offer you the best partnership with our friendly, trusted, and helpful service.

Matthew Garnett
Managing Director

Outdoor Living Solutions

We have an extensive range of outdoor solutions designed to fit any commercial or residential project.

Awnings

Enjoy the many benefits of an awning, such as protection from the sun, a shaded spot for customers to sit down for a cuppa, or extra cover for the BBQ in your garden. A versatile and proven solution, an awning creates an attractive and functional addition to your home and business.

Awnings

Shade & Protection

Enjoy an oasis of comfort regardless of the weather with an awning for your outdoor space. Awnings provide sun protection in the heat of summer and a dry place for dining, drinking, and relaxing when the weather turns unpleasant.

Variety of Installation Solutions

Enlarge your living or business area with an attractive awning solution that is perfect for your outdoor space. We offer a full range of awning products from retractable awnings to large, fixed awnings for any sized garden or outdoor area. Professional installation guarantees a perfect fit for your building.

Visually Appealing Additions

Show off your home or business with a standard or bespoke awning. You can benefit from our close partnership with some of the world's leading fabric designers and producers. Combine one of our beautiful awning fabrics with your branding to create the ideal solution for your home or business.

Wide Range of Awnings

Our extensive awning product range covers everything from traditional Victorian box awnings to the latest in contemporary folding arm and spring tensioned awnings. We have a solution that meets all your needs for commercial and domestic applications.

Arond 350

Arond 350

The Arond 350, is a classic, non-cassette / open entry-level awning system – high on quality and low on budget. A perfect system to get started with. Its sturdy construction, basic but pleasing design, and precise manufacture justify its excellent reputation.

Arond 350 is a classic style awning system, with a careful design and great features. Lateral end-fixing points, with no steel square bar, ensure dynamic flexibility for installation. Complemented with ONYX-400 arms, dimmable lighting is an option, turning the terraces into protected spaces to enjoy during dusk and into the evening.

The maximum dimensions are 6,000mm width x 3,500mm projection, providing a maximum of 21m² of shade and coverage, the Arond 350 patio awning is our entry-level, non-cassette folding-arm awning system. With its contemporary design, it is perfect for all balconies and roof projections.

Bobcat | Storbox 250

Bobcat | Storbox 250

The Bobcat | Storbox 250, with its design and technology, offers the perfect balance between efficiency, strength, and lightness. An elegant design featuring aerodynamic lines that conceal the mechanical installation elements, helps to blend it into the most distinguished applications.

The design gives an impeccable appearance of great aesthetic value and high quality. Easy to install and requiring little maintenance, whilst retaining a long-life span, a perfect full cassette system, for small spaces.

The UK public are becoming more accustomed to enjoying drinking and dining outdoors. Patios and decking areas at both residential locations and also commercial sites such as pubs, bars and restaurants are increasingly popular spaces to enjoy a meal, drinks and social gatherings. Designed to improve the appearance of outdoor residential and commercial spaces, a Bobcat | Storbox 250 protects users from the sun, but also just as importantly, any light weather conditions providing a reliable, durable, and dynamic shelter.

The maximum dimensions are 4,500mm width x 2,500mm projection, providing a maximum of 11.25m² of shade and coverage, the Bobcat Storbox 250 patio awning is our entry-level, full cassette folding-arm awning system. With its modern and quadrilateral, flush and full cassette design, it integrates seamlessly within a variety of different architectural styles to the building's façade, giving a contemporary and solid appearance, when retracted.

Puma | Storbox S-300

Puma | Storbox S-300

The Puma | Storbox S-300 is a newly designed practical and functional full-cassette folding-arm awning system with benefits to win over installers and end users alike.

Superseding our ever popular old Puma system, the new Puma | Storbox S-300 system is the impressive new kid on the block!

Our technical team have worked hard on the design of this system to obtain the advantages of its predecessor whilst improving an excellent and professional-level product that allows for even easier and quicker installation, comfortable and effective regulation, a wide pitch inclination range within all its positions, and a large 6,000mm width capability, with no need for intermediate supports.

The result is a versatile full-cassette awning which adapts to all spaces and can be operated either manually or via a motor. In all options, the Puma | Storbox S-300 provides a highly durable and resistant appearance.

Maticbox S-350

Maticbox S-350

A full cassette awning system - your ultimate solution for stylish sun and weather protection.

Contemporary architecture, with its straight and lively designs, represents a challenge for integrating façade elements. The aesthetics of the Maticbox S-350 make it perfect for incorporating into facades thanks to its stylised structure and straight-line design. It installs with minimalist styles, whilst offering advanced technical features to obtain great lines specially designed with the needs of prescription professionals in mind.

Discover the perfect combination of beauty and functionality with full cassette awnings. These sturdy patio awnings can transform your outdoor space into a cozy retreat, regardless of the weather. Their weather resistance ensures that your patio, terrace, or balcony remains inviting in bright sunshine, light rain, or moderate windy conditions, without worrying about damage. The design of a full cassette awning ensures optimal protection from the elements, keeping the awning in top condition for years.

Embodying an urban lifestyle with confidence, the Maticbox S-350 is the ideal model for those who appreciate simple elegance. With its clear and slim appearance, customisable lighting elements, and a wide range of options, this awning is a versatile option that adds a touch of sophistication to any outdoor space.

Tiger | Storbox 400

The UK public are becoming more accustomed to enjoying drinking and dining outdoors. Patios and decking areas at both residential locations and also commercial sites such as pubs, bars and restaurants are increasingly popular spaces to enjoy a meal, drinks and social gatherings.

Designed to improve the appearance of outdoor residential and commercial spaces, a Tiger | Storbox 400 protects users from both the sun, but also just as importantly any adverse weather conditions providing a reliable, durable and dynamic shelter. Since 1993, the Tiger | Storbox 400 folding-arm awning has been constantly evolving to set new trends.

The maximum dimensions are 6,000mm width x 4,000mm projection, providing a maximum of 24m² of shade and coverage, the Tiger | Storbox 400 patio awning is our premium folding-arm awning system. With its modern and quadrilateral, flush and full cassette design, it integrates seamlessly within a variety of different architectural styles to the building's façade, giving a contemporary and solid appearance, when retracted.

Dimmable LED lighting can also be integrated into the front profile fascia, as well as within the heavy duty ONYX-LUX arms, guaranteeing at least 10,000 arm movements and ensuring peak fabric tension at every position, suitable for even the most challenging of applications.

Jaguar | Modulbox 400

Jaguar | Modulbox 400

The Modulbox 400 is a range of folding-arm awnings within a monobloc system, designed to achieve maximum dimensions with a compact and attractive configuration. Using the same components, three design progressive solutions are achieved: Cougar (full-cassette), Panther (semi-cassette) and Jaguar (non-cassette).

Designed to improve the appearance of outdoor commercial spaces, the Modulbox 400 covers a width of up to a massive 12,000mm by 4,000mm projection, in a single cover, in a single system. Protecting diners from both the sun but also more importantly, any adverse weather conditions providing a reliable, durable and dynamic shelter.

This system is based on an aluminium framework structure, with a MONOBLOC articulated arm system. This results in the system having all the advantages of a standard retractable folding-arm awning, resulting in a more robust and stronger system. This produces a more adaptable and easier solution within installation for the adjustment of the folding arms. The Modulbox 400 awning system allows greater coverage in a single unit.

Traditional Victorian Box

Traditional Victorian Box

The Victorian Box awning remains the quintessence of British awning design and is still handmade today, as it was in Victorian times.

One of the strongest and most practical awnings available today, the structure has lasted for centuries. An obvious choice for buildings of historic value and are often insisted upon by councils for conservation areas, the Victorian Box awning can equally look just as impressive for modern applications.

James Robertshaw has been crafting traditional Victorian Box awnings since 1860 and is highly regarded as the primary manufacturer and installer of this classic style of awning throughout Great Britain.

Our time-honoured manufacturing techniques are enhanced by the use of contemporary tooling and technology. This approach ensures that our awnings not only adhere to the design standards set by the original style, but also benefit from the use of modern components where appropriate, adding to the product's durability and lifespan.

Duox

The UK public are becoming more accustomed to enjoying drinking and dining outdoors. Patios and decking areas at both residential locations and commercial sites such as pubs, bars and restaurants, are increasingly popular spaces to enjoy a meal, drinks and social gatherings.

Designed to improve the appearance of outdoor commercial spaces, a Duox protects diners from both the sun but also more importantly any adverse weather conditions providing a reliable, durable and dynamic shelter.

Learn to stand on your own two feet. The Duox freestanding awning is a self-supporting awning system that starts from a single central roll-up barrel tube, providing shade and coverage on both sides of the system.

WingLight

The UK public is becoming further accustomed to enjoying drinking and dining outdoors. Patios, terraces and decking areas with both residential and commercial areas such as pubs, bars and restaurants are an increasingly popular area to enjoy.

Designed to improve the appearance of outdoor spaces, a WingLight protects diners from the sun's radiation, in addition to adverse weather conditions, providing a reliable, durable and dynamic shelter. Two versions of WingLight are available, depending on your specification requirements: The WingLight Compact is a free-standing, double-sided folding-arm awning with one central roller tube and one motor drive, resulting in the awning fabrics projecting in synch, on both sides. The entire double-sided folding-arm awning is supported by two solid aluminium upright posts, which are installed into the substrate, using cantilever feet. The maximum shading area is 38 m².

The WingLight Solid is a free-standing, double-sided folding-arm awning with two roller tubes and two motor drives, enabling the two sides of the awning to be operated individually and the awning textile to be projected separately. The entire double-sided folding-arm awning is supported by two solid aluminum upright posts, which are installed into the substrate using flanged plates or ground insertion tubes. The maximum shading area is 49 m².

Pergo-Line

Pergo-Line

As our summers get hotter, we need solutions that cover all requirements. Whether for a patio, veranda or freestanding space, James Robertshaw design and manufacture systems to shade and protect large areas - all with the quality and choice that you would expect!

On warmer days, awnings provide an airy alfresco ambiance. On colder and inclement days, heating and outdoor blinds or retractable glass balustrades provide protection, giving that unique garden party feeling and resulting in your business becoming even more attractive to diners. Awnings expand your commercial or residential hospitality space by substantial square meter coverage, enabling maximum profit.

Counter-tensioned awning systems provide shade and shelter for large, flat and square or rectangular areas and are the ideal complement to modern glass architecture. The systems are operated by the built-in counter-tensioning device (a spring mechanism within the fabric roll), which keeps the fabric taut in any position, resulting in the system being more resilient in wind than folding-arm awnings. Systems (even linked together) can be created without direct lateral light ingress.

The Pergo-Line terrace awning system contributes to additional covers, longer dwell time and increased spending, within the leisure and hospitality industry.

In addition, these systems are ideal for shading and protection within the residential sectors.

Note, if the Pergo-Line is being specified to protect against rainfall, a minimum pitch angle of 15 degrees is required as standard.

X-Line

X-Line

Roof awnings are designed to complement glass roofed products such as Pergolas. They provide additional control over sun protection.

The X-Line is designed to provide the ideal room temperatures within glazed areas (pergolas, conservatories, atriums, glass rooms and skylights), whatever the orientation of the sun.

Designed to shade large, rectangular and plain surfaces, the textile fabric is extended by a counter-tensioned system, with the spring mechanism being installed within the roller tube. As a result, the tensioned textile is guaranteed within any opening position. The X-Line can be pre-assembled to a high degree within the production process, resulting in quicker installation, and saving both time and money.

The X-Line can be installed to run upwards. It can also be joined (two systems operating as one, with one motor) and row systems (several elements with a motor each) are possible.

Elit

A terrace and garden awning that allows endless possibilities to enjoy the outside of the home and create new, intimate and well-protected spaces. From the basic structure of this awning, we can obtain several models according to the specific needs of each installation.

Discover the elegance and stability of our Elit pergola awning system. These awnings offer proven sun protection benefits and seamlessly blend into modern architecture. With options like wall-to-wall installation, wall-mounted and freestanding options and a variety of lighting and column variants, you have the freedom to design your ideal outdoor space. The Elit is a price-conscious, entry-level pergola system, designed to meet any budget, whilst maintaining quality.

These pergolas are not just visually stunning; they also offer a wide range of features: meticulously designed for great aesthetics, all the elements used to support the pergola are hidden. Angle brackets within the corners of the system make the structure very stable. An inclined transverse bar system keeps water from accumulating within the pleats when it rains. A second piece of textile can be installed above the pergola to help keep the fabric in premium condition, whilst creating an insulating thermal barrier (with a 4-slot transverse bar).

In addition, it is possible to cover a surface area of 5,000mm x 6,000mm, with no need for intermediate column pillars.

With intermediate column pillars, the structure can reach dimensions of up to 7,000mm x 6,000mm.

Simplicity 6

Simplicity 6

Invite the great outdoors into your home by removing any fear of the elements intruding whilst having your patio or French doors open, or relax outdoors under a robust sheltered space with a variety of protection levels available to suit the needs of your property or location.

The Simplicity 6 is a stylish veranda, canopy, carport and glass room system glazed with 6mm toughened glass. With elegant posts and optional glass roofing, this product offers you a deluxe canopy or veranda, at an affordable price.

By featuring the option of glass roofing, the Simplicity 6 offers improved acoustic properties – reducing the noise of raindrops during a downpour; these glass panels also provide a sparkling finish which is easy to maintain, particularly if you choose the self-cleaning glass.

The Simplicity 6 is the perfect pergola solution for residential gardens and provides an effective and stylish cover from the weather for alfresco dining and garden parties.

With a projection of up to 3,500mm from its supporting wall and an unlimited width, you will have a solution that can be adapted to suit your exact needs.

Ocelot

Ocelot

The Ocelot drop-arm awning is a neat and versatile sunblind. A very cost-effective method of shading and screening; a sturdy, but lightweight, system. Operating from a fixed pivot point, the Ocelot's arm drop is the same as its projection.

These sunblinds can be stopped in the position that is required. If low-lying sun is a problem, they can be extended to 155° enabling shade to cover most of the window if necessary.

Our refined and condensed drop-arm awning can be installed seamlessly into any facade to provide sun cover for your windows. Or, quite the opposite, become a striking statement piece that will bring attention to your business.

Installed on individual windows, this solution is best suited for offices, schools, homes and shop fronts where the amount of light that enters the room requires to be regulated flexibly at certain times of the day. Manually or electrically operated side arms, providing sun-shade protection even against very low sun.

WAY IN

Outdoor Blind Solutions

Discover innovative outdoor blinds for your building. Outdoor blinds work great for folding patio doors, conservatories, and skylights. They will protect people and furnishings from unwanted sunlight and heat from the sun. We offer two distinct product lines, roller and venetian.

Outdoor Blind Solutions

Whether you are improving living rooms, offices, or greenhouses, we have the right options for your installation. Extend the blinds down to increase your daytime privacy or roll them up to let more sun in to warm the room on a cold morning.

Automated Electric Blinds

You can combine external blinds with smart home technology. This makes it easier to keep your house at the right temperature. You can easily adjust the light levels to suit your mood and schedule.

Efficiency Above All

External blinds are very efficient because they stop the sunlight from reaching the glass. This dramatically lowers the heat gain caused by the sun. Side guides and high-quality materials prevent sagging and flapping.

Suitable for the Weather

External blinds from James Robertshaw can withstand many weather conditions. Of course, they should be protected in a gale. But they are engineered for normal use in cold, rain, wind, and harsh sun.

Professional Designs

We design and install each set of external blinds individually. Whatever your price, furnishing, and exterior style, we can work with you to choose the best blinds for your windows, patio doors, or commercial building.

Elite Outdoor Roller Blind

Create the perfect outdoor space with our Elite Outdoor Roller Blind system. These blinds are a game-changer for pergolas, verandas, and any open aperture space, making outdoor relaxation and entertainment possible in any weather. With a unique locking mechanism for windproof installation, durability, and reliability, these blinds are a must-have for commercial or residential use.

Our exclusive Crystal Zero transparent PVC textile with Preconstraint 302 stabilizing border ensures an unobstructed view and provides a clear two-way vision, perfect for commercial spaces. Consider the Elite with the Soltis Veozip performance PVC for increased natural light gains and thermal comfort.

Transform your outdoor space into a cozy and comfortable extension of your home or business, protecting you from the wind, rain, and heat. Additionally, eliminates excessive heat buildup and harmful UV rays by installing external roof blinds on structures with glass or polycarbonate roofs, creating a safe and enjoyable outdoor environment for everyone.

Eliminate®

Eliminate® 500 Zip Outdoor Roller Blind

Big or small, manual or automation. Indoors or outdoors. Blackout or screen solutions.

High performance external zip roller blinds installed to the building's façade (in front of the glass on the outside) efficiently control solar glare (light), solar gain (heat) and UV (ultraviolet) to the buildings glazed areas, guaranteeing a cool, relaxed, and pleasant indoor space.

Forming a screen either in front of a buildings glazing or an open aperture space, outdoor roller blinds control and block a significant amount of the sun's solar gain energy, resulting in the reduction of temperature within the interior of the building or structure.

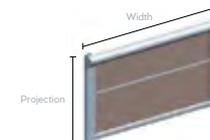

This keeps the interior space naturally cool and in turn reduces the carbon footprint requirement of air conditioning units and cooling devices. In addition to the thermal benefits, outside roller blinds also act as a wind and rain barrier.

> VENETIAN BLINDS

VZ70 / VZ90

VZ70 / VZ90

Sunlight control – your way! With external Venetian blinds, you can perfectly control the room climate to your needs. These blinds provide optimal heat protection in direct sunlight. The slat position is continuously adjustable, allowing you to set the slat angle with pinpoint precision to direct natural light into the room. Additionally, you can protect yourself from prying eyes. The high-quality materials used guarantee the long life of Venetian blinds.

The VZ70 and VZ90 external venetian blinds are designed to be mounted on the side of your window and offer 70mm or 90mm slats with a choice of rail or cable guide options. They come in a variety of stylish designs to provide better shading and soundproofing. Plus, the slat profiles are equipped with a special silencing "lip" that reduces noise from the slats banging together in windy conditions and enhances the darkening effect when the slats are closed. Not to mention, these blinds offer excellent slat rotation and closing performance. Say goodbye to noisy, inefficient blinds and upgrade to the VZ70 or VZ90 for a more peaceful and stylish window covering solution!

F80

Sunlight control – your way! With external Venetian blinds, you can perfectly control the room climate to your needs. These blinds provide optimal heat protection in direct sunlight. The slat position is continuously adjustable, allowing you to set the slat angle with pinpoint precision to direct natural light into the room. Additionally, you can protect yourself from prying eyes. The high-quality materials used guarantee the long life of Venetian blinds.

The F80 is a side-mounted external Venetian blinds with cable or rail guide options. 80mm slats are designed variants to ensure enhanced shading and soundproofing, combined with very good slat rotation and closing performance. Low pelmet heights and, of course, an elegant appearance set the side-mounted external Venetian blind apart. The F range is a system with a flat-profile aluminium slat shape and is designed and manufactured to be extremely robust, with a rail-guided slat curtain mechanism, providing superior wind stability. These systems are available with a rail guide option.

A timeless classic – whether it’s an inner-city apartment block or a family home in the countryside, no matter which of the many product or pelmet variants you opt for, external blinds are the timeless classic. With external venetian blinds, the room climate can be adjusted perfectly to your requirement.

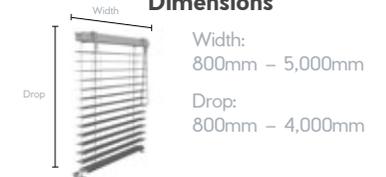

In direct sunlight, exterior blinds provide optimal protection from the heat; they also allow for optimal control of natural light, as the slat position can be easily adjusted. External blinds are a cost-effective solution which retains the high level of functionality. These systems are available with a cable guide option.

Canopies & Walkways

Welcome customers with branded, stylish covered walkways from James Robertshaw. Perfect for walkway canopies to help your guests avoid inclement weather.

Canopies & Walkways

Stylish Open Space

Mounting a walkway canopy to existing buildings is a cost effective way to improve their overall appearance. The large range of fabrics and designs can add style while also forming a comfortable transition from indoors to outdoors.

Durable Structure

A wall-mounted canopy over your entrance or a walkway canopy stretching across the facade of your building will be exposed to the weather for significant periods. Our structures are built to lead the industry in wind resistance and will be attractive after years of use.

Design Flexibility

Choose the perfect fabric colour and add your branding. But then take things a step farther and include LED lighting and heaters. Your canopy and walkways will draw people. They can be combined with other products, such as planters and barriers, to welcome and direct visitors.

Retractable Options

If you choose a canopy, you can include an automated folding system to retract it. Canopies aren't always necessary. There may be times, such as school breaks, closing hours, or in really bad weather, when it makes sense to fold your investment away for its own protection.

Parasols

Enhance your brand and provide reliable shelter from the sun and rain with a parasol from James Robertshaw. Create a custom look with a variety of colours and branding options. Add electric heaters and LED lights for a cosy atmosphere.

Parasols

Adjustable Shelter

All our garden umbrellas and parasols can be moved to change your garden furniture layout. The large size creates a shaded area suitable for outdoor dining, cafes, or a seating area on your back garden.

Durable Structure

Every garden parasol and parasol base works together to create a reliable and durable system. Our parasols boast an industry-leading wind classification so you can trust them to stand up to spring showers, summer sun, and autumn weather.

Suitable for All Styles

We can collaborate with you to choose the perfect colours, fabrics, and designs. Your new garden parasols will be a great addition to your business. The high performance fabrics and eye-catching branding will be a great addition to your business and can attract new customers.

Optional Umbrella Accessories

Match your parasol and parasol bases to accessories to create the right feel for your space. Add an LED light system for a cool effect at night. If your parasols will be used through the colder months, we can pair them with heaters to make guests more comfortable during chillier evenings.

> SMALL PARASOL

Filius

Filius

The small parasol that's big in quality. The Filius is the smallest of our centre pole parasols. This parasol for the hospitality industry and retail use is only small when it comes to its dimensions – in terms of quality, convenience of use, design and stability, in contrast, the FILIUS is a top performer in our parasol collection.

The lightness in weight, makes the Filius a particularly popular way to provide protection from the sun at outdoor cafés, at markets, as a shelter at events, or for use for decorative purposes. The Filius is, of course, also an attractive parasol for use in the garden or on the patio at home. The centre pole parasol, Filius is optionally available with a cable pull or with a winding handle.

Schattello

Schattello

The Schattello is the perfect large parasol for the hospitality trade and other commercial applications. Whether large-scale sun protection in a street café, stylish shading for outdoor catering, elegant roofing of public areas at trade expos or events, as a round parasol, rectangular parasol, square parasol or triangular parasol - the Schattello is the right parasol for high professional demands.

The tried and tested telescopic system and gearbox positioned within the centre pole, provides stability, functionality and durability. It is operated by crank handle or crank pin, the parasol frame (skeleton) raises when closing, so that, the Schattello can be closed above table height.

Adjustable, self-tensioning telescopic spring system within the reinforced arm spokes, ensure automatic retightening of membrane cover, as well as quick and easy recover requirements.

The Schattello allows installation options of in-ground, base plate, set in a concrete foundation, or a ballast freestanding solution.

> LARGE PARASOL

Albatros

Albatros

The Albatros centre pole parasol excels where other large parasols have limitations, while also introducing new possibilities for providing shade and cover for outdoor spaces.

The large Albatros parasol can cover an area of up to 78m² while making a stylish impression. In addition to its XXL format, it features a clear design and elegance that will harmonise effortlessly with any architectural environment.

The largest in our parasol collection for the hospitality, hotel, event, and retail industries meets the most stringent requirements for stability, ease of use, and wind safety.

The Albatros features a reliable telescopic system and gearbox located in the centre pole, providing stability, functionality, and durability. It can be operated using a crank handle or crank pin. When closing, the parasol frame raises so that the Albatros can be closed above table height. The reinforced arm spokes contain an adjustable, self-tensioning telescopic spring system, ensuring that the membrane cover is automatically retightened and making it quick and easy to replace if needed.

The Albatros offers various installation options, including in-ground, base plate, concrete foundation, or ballast freestanding solution.

> STORM PROOF PARASOL

Vortex

Vortex

Vortex is the uncompromising solution for elegant, durable shade and shelter. Meticulously designed and developed with the customer in mind, Vortex is the definitive choice for customers who refuse to squander time, money, and effort managing and upkeeping parasols.

Crafted in the UK, the Vortex High Tensile Commercial Umbrella is the ultimate answer for outdoor cover and alfresco dining, delivering both shade and shelter year-round. It is the sole umbrella capable of withstanding up to gale force eight winds (up to 100km/h). It is a genuinely 'fit and forget' umbrella, unlike all others that necessitate management in varying weather conditions.

The Vortex Umbrella confidently enters an area where few manufacturers dare to tread. It is purposefully designed to remain up and open throughout the year due to its meticulous blend of materials and engineering. It is effortlessly maintained, thanks to its enduring and tear-resistant material, waterproof with high UV resistance, and a framework made of premium stainless steel. There would only be a few days in the year when closing the umbrella would be considered, or of course out of season in a commercial environment. Most umbrellas are neglected by establishments and are left to get damaged in high winds.

Scan for more information

This is an unparalleled and robust umbrella that withstands Wind Force 11. It offers commercial sun and rain protection with the added advantage of an exceptionally high wind rating, making it ideal for the catering and restaurant trade where managing umbrellas is challenging due to rapid weather changes. Who will consistently close the umbrellas down every night without fail?

With lights, heaters, and the pole-mounted table, Vortex parasols are an essential addition to any outdoor area in a bar, restaurant, cafe, or club.

Barrier Solutions

Create more space for customers to enjoy with a cafe barrier system. Use a combination of branded cafe barriers, planters, and glass barriers to create outdoor seating areas that expand your business.

Barrier Solutions

A cafe barrier system can be a simple affair with stainless steel posts and cafe banners. Or it could be a full setup with planters, glass barriers, and branded elements. Whatever you choose, the result will be a more attractive and profitable outdoor space.

Showcase Your Brand

Highlight your brand with top quality cafe banners. Each printed banner displays your brand, logo, or promotions on the pavement or pedestrian area. Since these are very affordable, it is easy to create replacement cafe banners for seasonal promotions.

Cafe Barrier Kits

We can design your cafe banner system to include printed cafe banners, retractable queue barriers, and cafe windbreaks. You tell us what you want, and we will put together the entire package so it's ready to set up or install.

Adjustable or Fixed Installation

Glass cafe barrier systems are a step up in quality. They will really set your space apart and create an extension of your business. We can help you choose a fixed installation or an adjustable solution to create sheltered locations for cafe tables or a smoking area.

Add a Green Space

Make your local area a little friendlier with planters. Our timber or composite planters can also heighten your brand exposure thanks to our graphic design service. The planters are perfect for outdoor use and can be left outdoors all year round.

Café Barriers

Café Barriers

Our collection of cafe barriers provides a sophisticated and practical solution for cafes, restaurants, and other hospitality establishments. These versatile barriers not only define your outdoor seating area but also serve as a canvas for branding, menus, or other messaging.

Crafted from durable materials, our cafe barriers can withstand outdoor conditions and create an inviting and comfortable atmosphere for your customers. Whether you're looking to create a cozy cafe atmosphere, promote your menu, or enhance your brand presence, our high-quality cafe barriers offer an attractive and effective solution for your hospitality business.

Create the perfect outdoor space for your establishment without compromise. Our Café Barrier posts are crafted from high-quality stainless steel to ensure unrivalled durability against the elements, while the weighted bases guarantee unwavering stability, even in the face of strong winds. Benefit from our custom-length panels and comprehensive branding service to achieve the flawless look you desire.

Acrylic, mesh and PVC screen covers can boldly display simple logos to effectively promote your business or brand, and can be fully digitally printed, making them an ideal canvas for intricate designs or short-term promotions. Our Café Barrier posts are engineered for enduring performance, forged from stainless steel to withstand the most demanding commercial environments.

Furthermore, the option of powder-coating presents an opportunity to imbue your screens with a distinct appearance that perfectly complements your brand.

Embrace the versatility of our Café Barrier bases, available in a range of sizes and weights. From lightweight bases ideal for interior settings to broader, heavier bases designed to ensure unwavering stability in windy locations.

Wind-Dam

Wind-Dam

For a truly unique alfresco feature, look no further than Wind-Dam. These glass barriers are adjustable, extending upwards when desired, to provide extra protection to your patrons. Available in a range of sizes and colours, Rising Screens are the perfect way to define and enclose your outdoor space.

The Wind-Dam is a glass balustrade system that provides many commercial and customer benefits to your business:

- Wind-Dam protects from the wind and extends the time your customers can enjoy being outside.
- Wind-Dam can elegantly define an area within your outdoor space.
- With a contemporary and stylish design, Wind-Dam adds a touch of luxury to any outdoor space to impress your guests.
- Adds protection from falling or from hazardous areas.

The ideal settings for Wind-Dam glass balustrade to protect from the elements and upgrade your outdoor space include restaurant patios, decking areas, balconies, roof terraces, around a hot tub.

How does it work? This unique and innovative product will rise from a standard 1,100mm high to 1,800mm by simply applying pressure to the top edge of the glass. With no complicated mechanisms,

Mini-Post Frameless

Mini-Post Frameless

Being extremely versatile, Mini-Post fixed glass balustrade kits are ideal for glass balconies, patio areas, terraces and can be an effective safety handrail system.

There are a number of options when choosing the Mini-Post fixed balustrade system including base, core, edge, or side mounted designs. The sleek bottom mini stainless steel posts are designed to accommodate glass thicknesses from 10mm to 17.5mm. To achieve a more bespoke design, we have a choice of glass coloured tints available to act as a privacy screen.

These designs are tested to surpass the requirements for UDL loadings meeting domestic requirements of line loads of 0.74kN. Ideal for use on domestic projects and areas of low pedestrian traffic. The high strength comes from the use of 2205 Duplex stainless steel. This makes the component very strong and highly resistant to corrosion even in extreme marine environments.

The Tilt-Lock design is an ingenious way making the install of the system as simple as possible. With a simple twist of an Allen key on the body of the post, the glass self-levels and this easy adjustment saves a lot of time and hassle during installations.

We also provide a number of railing options making this a truly customisable solutions with lots of glass and railing balustrade variations. All design considerations depend on your requirements matching your needs with building safety and regulations considered.

Looking for top-quality roller blinds for your office or residential space? Look no further! At our UK-based production facility, we design and manufacture commercial and residential roller blinds using only quality materials. Imagine custom-made roller blinds in your brand's colours or featuring your logo – a fantastic way to elevate your space's appearance.

Our roller blinds are not only stylish but also durable, long-lasting, and excellent at controlling the sun's heat and light. Whether it's for a retail store, office, or hospitality space, our commercial roller blinds are the perfect fit. With our wide range of blind performance textiles, you'll find the ideal shading solution for any environment. We take pride in designing and manufacturing our commercial blinds in-house to ensure top quality. Trust us as your supplier for some of the best roller blinds on the market!

The systems number reference depicts the dimension of the aluminium or stainless steel barrel used within the roller blind, determining the blind size tolerances – the bigger the tube, the bigger the blind!

Greenhouse

Greenhouse

Step into a world of effortless greenhouse management with our state-of-the-art roller blinds! Crafted from a tough, green synthetic material, these blinds are a perfect fit for your greenhouse. By providing internal shading, they offer the most effective way to control temperature and shield your plants from the harmful effects of direct sunlight.

With an internal installation, these blinds are shielded from outdoor elements, creating a visually appealing workspace for you. Specifically designed for greenhouses, our roller blinds are securely fastened to the framework, delivering 60 percent shade to keep your greenhouse, plants, and yourself cool during the scorching summer months, all while allowing essential natural light to filter through for optimal plant growth.

Operating on a spring-loaded aluminium roller, these blinds give you precise control over the greenhouse temperature. What's more, their individual design ensures a perfect fit for your greenhouse's unique shape.

Choose from our range of green or white mesh PVC material and safeguard your precious plants from sun damage while creating the ideal growing environment!

Mini Eliminate® Zip

Mini Eliminate® Zip

Experience the versatility of zip roller blinds, perfect for dim-out, shading, light and heat control, bedrooms, insect screens, room dividers, AV / business presentations, medical areas and home cinema screens.

These blinds feature a cutting-edge zip ribbon that's welded to the edge of the textile, creating an ultra-strong, flat join. The ribbon is securely held in a sleek plastic side channel, allowing the blind to move effortlessly and silently while ensuring the textile stays put. Not only do the side channels provide an excellent light seal, but the hem bar is also equipped with a brush strip to minimize light ingress around the base of the blind.

Our full cassette system does more than save energy—it traps air between the glazing and the blind textile, offering additional insulation. According to the Chartered Institute of Building Services Engineers (CIBSE), our full cassette blind with a low emissivity textile, is 8.8 times more effective than a standard roller blind in terms of thermal resistance. When fully closed, the blind helps reduce noise and offers exceptional wind resistance when windows are open, thanks to the robust guides that prevent the cloth from pulling or blowing out of the side channels.

Elevate your space with our innovative zip roller blinds today!

> VERTICAL LOUVRE BLINDS

89mm & 127mm

89mm & 127mm

Vertical blinds are a great solution for controlling how much light enters a room. You can adjust the vertical blind from fully closed to completely open. They are also a much more versatile solution than older venetian blinds.

Vertical louvre blinds are a perfect solution for many spaces. They retract out of the way, making them ideal for bay windows, larger windows, bi-fold doors, and more. We can craft them to be the perfect fit for your windows and doors.

You can set your vertical blinds to control the amount of light entering your room. They are easy to adjust with a simple cord system. Weights hidden in the bottom keep the blinds steady and stop unwanted swaying.

We have vertical blind fabrics and materials suitable for every environment. Blackout vertical blinds provide ultimate light management. Voile vertical blinds add elegance with their sheer fabrics. Flame retardant and moisture resistant fabrics suit clinical and commercial rooms.

One practical problem with horizontal blinds is dust. Vertical blinds collect less dust on the slats. Waterproof fabric and plain textures are the perfect choice for blinds that wipe clean with minimal effort. These are perfect for conservatory and kitchen blinds where dust and dirt collect quickly. Vertical blinds are available in either 89mm or 127mm fabric widths.

> BRANDING & SIGNAGE

Branding & Signage

High resolution, UV stable, full digital edge to edge print solution.

Bring your awning to life with a choice of graphic options. Using either print or traditional CAD vinyls if required. We can provide fully colour matched roof and sides sheets.

Good relationships are at our core. So when you decide to specify and order a James Robertshaw awning for your vehicle, you will have a dedicated friendly sales person from the outset who will explain everything from start to finish and who will always be on hand for whatever you need. It's the least we can do for you.

Awnings & Canopies

Awning, French and Waterfall canopies: £110.00 per linear meter of branding width (not awning or canopy width).
Minimum 500mm increments.
Minimum charge is 1,000mm.

Dutch Canopies: £70.00 per linear meter width of branding width (not canopy width).
Minimum 500mm increments.
Minimum charge is 1,000mm.

200mm valance: £100 + VAT each

Example

If the awning cover is 5,000mm (w) and the printable area is 2,200mm (w), the cost is £275 + VAT = 2.5 x £110 + VAT.

If the canopy cover is 5,000mm (w) and the printable area is 3,100mm (w), the cost is £245 + VAT = 3.5 x £70 + VAT.

Café Barriers

Café barriers: £60 + VAT each.

Roller Blinds

Please quote on a square meterage rate (not per meter width): £60 + VAT.

Please note, a minimum charge of £45 + VAT, per order.

The above is based on the print size specified (although this will alter to product size if the requirement is a full cover print).

Example

If the roller blind is 2,500mm (w) x 2,500mm (d) and the printable area is 1,000mm (w), the cost is £45 + VAT.

If the roller blind is 2,000mm (w) x 2,000mm (d) and the printable area is a full edge to edge cover, high resolution print, the cost is £240 + VAT.

CMYK and RGB will never give an exact colour match. If a colour match is required, provide a Pantone colour code. Branding proofs will be provided by our design team for client confirmation and sign-off, prior to the project being released into manufacture.

*Client to provide own artwork in a high resolution image (JPEG or PDF at a minimum resolution of 300dpi) or a vectored format file (AI, EPS or PDF).

A branding sign-off form will be produced for approval by the client. Manufacture will not commence until confirmation approval is agreed.

NOTE: A natural occurrence of acrylic on folding-arm awnings, is the appearance of ripples / feathering down each seam. Please refer to the page 17 for further information.
