BESPOKE AWNINGS & BLINDS

Family owned James Robertshaw has over 160 years experience of designing, manufacturing and installing bespoke awnings, coverings and blinds for the specific needs of operators in the leisure & hospitality, blind & curtain trade and residential sectors.

About Us.

Our story began back in 1860, when Mr James Robertshaw of Collyhurst, Manchester set up shop manufacturing traditional box shop awnings, complete with hand-carved woodwork. Added to this were metal roller blinds and other companion components, all fabricated on-site, beginning an unbroken trading history spanning an incredible seventeen decades, three centuries and two millennia.

During those first one hundred years, JR cemented its company status with a number of patents, including its famous 'Spring Roller' design in 1908. That commitment to innovation and technical advancement remained at the heart of the organisation ever since

From the Victorian age of the Industrial Revolution, through two World Wars and more than a few depressions, the company survived and thrived. It re-located from its original factory in Collyhurst and settled in a historical spinning mill in Farnworth.

The business stayed within the Robertshaw family until the death of James' grandson, William Lancelot Robertshaw in 1960 and was purchased by then Production Manager Arthur Harrison. It is then that the modern story of JR really begins.

In 1978, the company was taken over by 25 year old Nigel Sharrock, who would carry the JR brand from out of its Victorian history and into the modern world. For nearly forty years, Nigel continually strove to improve products, processes and service that JR is renowned for.

After Nigel's retirement in 2016, JR is still a family owned and managed business with Nigel's wife, Lesley and son Matthew, joining him sitting on the board of directors. In 2010 after 50 years at its Farnworth home, JR re-located again to its current, modern facilities and headquarters at Horwich, Bolton

All products are designed, manufactured and showcased within our current home and Customer Centre. With a wide reaching client base ranging from trade sub-dealers; independent bars and national hospitality brands; architects, contractors, residential, education and health-care; James Robertshaw has the creativity, expertise and knowledge to make a visible difference to any business or home.

James Robertshaw. We don't just find the solution, we create it.

Motorised Elit Flat Pergola System

Manual Elit Flat Pergola System

The most complete system for residential & lightweight commercial garden pergolas.

A terrace and garden pergola that allows endless possibilities to enjoy the outside of the home or hospitality venue and to create new, intimate, and well-protected outdoor spaces. From the basic structure of this system, we can obtain several designs of the pergola, according to the specific needs of each installation.

Motorised & Manual System For The End User

- > Meticulously designed for great aesthetics, all the elements used to support the pergola are hidden.
- > Angle brackets in the corners make the structure very stable.
- > Inclined transverse bar system keeps water from accumulating within the pleats when it rains.
- > A second piece of fabric can be installed above the awning to help keep the fabric in premium condition while creating an insulating thermal barrier (with 4-slot transverse bar).
- > It is possible to cover a surface of 5,000mm x 6,000mm with no need of intermediate column pillars.
- > With intermediate column pillars, the structure can reach dimensions of up to 7,000mm x 6,000mm.

Motorised System For The Professional Installer

- > Simple and reliable system, with the possibility of installing additional options retrospectively.
- > Adaptable to existing structures.
- > Requires low power motor.

Manual System For The Professional Installer

- > Configuration versatility thanks to the wide range of components.
- > Double column and foot for reinforced structures.
- > Runners with high wear resistance bearings.

ELIT FLAT PERGOLA SYSTEM

Motorised Elit Flat Pergola System.

> **Free-Standing**

> **Wall to Front Portal**

> **In-Between Walls**

Specification:

Without intermediate columns (mm)
 > Guides: 2
