SATIN S

A beauty to be discovered!

Our new product Satin S, with its flat roof style, is compatible with all architectural structures and offers you all comfort you need in a sophisticated clean appearance.

Protection against rain

Functionality and durability met with the basic design principles in this PVC canvas pergola.

Trapezium fabric is available to drain to one side or with water drainage on both sides.

Thanks to the slope of the trapezium fabric hidden in the 36cm high horizontal profile, Satin S provides a protection against rain and sun.

We add value to your outdoor areas with Satin S

Besides creating a personal atmosphere for yourself, Satin S can also be the perfect outdoor solution for hotels and restaurants, valued by homeowners and the commercial sector alike.

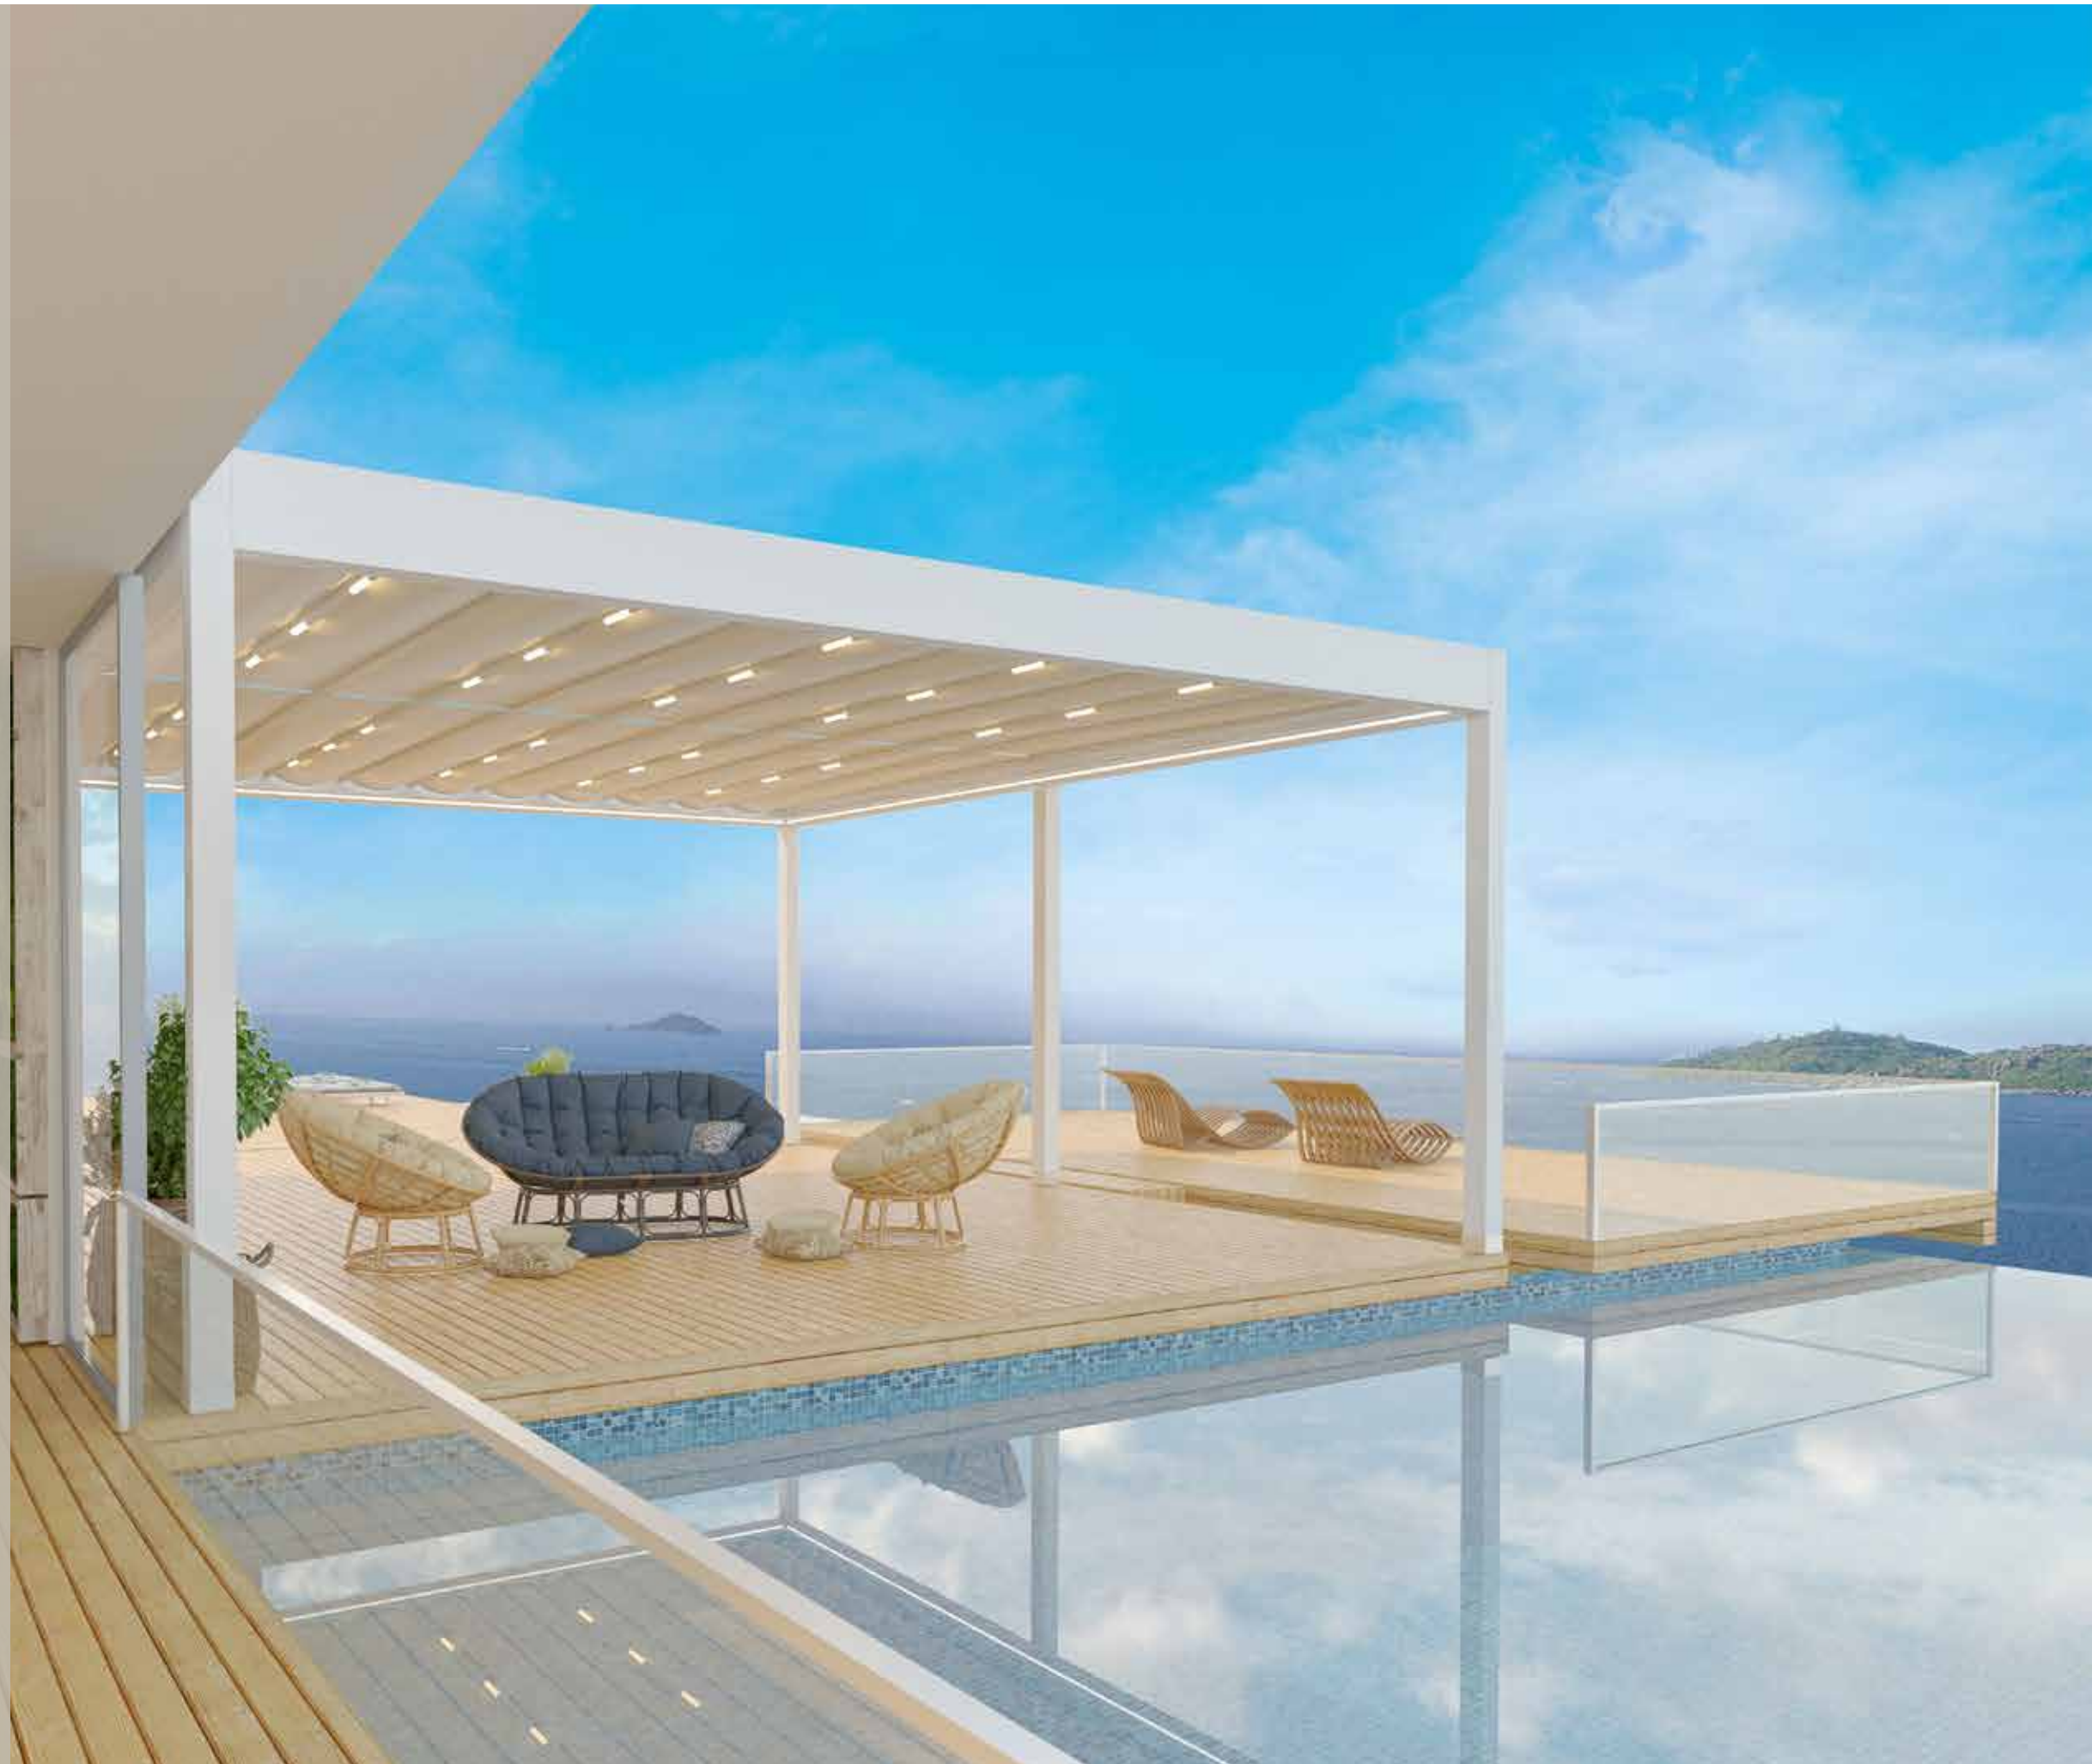

Customise your area

You can create your space according to your own taste with the Linear and Spot lighting options integrated into the fabric profiles, as well as the perimeter lighting option specially designed for this product.

8 GOOD REASONS TO CHOOSE SATIN S

- 1 Can be perfectly integrated with your structures and surrounding space with its flat ceiling shape.
- 2 Retractable PVC ceiling cover with aluminium construction will protect you from all severe weather conditions; sun, rain, wind.
- 3 Provides the ability to transform your outdoor areas into indoor areas that you can use all year round.
- 4 Increases the total capacity of your activity both for residential and commercial areas.
- 5 Gives an exclusive finish to your outdoor areas to make it comfortable and elegant.
- 6 With the slope applied to the waterproof PVC fabric and concealed drainage system, it drains the rain water.
- 7 Creates extra living spaces where you can reflect your taste with our lighting and color choices.
- 8 Applicable with any area sizes with our custom made solutions.
